ORGANISATION FOR JOINT ARMAMENT COOPERATION

VACANCY NOTICE

Post	A646 – LOGISTICS/SUPPORT SYSTEMS COORDINATION OFFICER
Grade	A3*
Division	FSAF-PAAMS Programme Division
Section	ILS/ISS SECTION
Management of Staff	0
Location	Paris area, France
Initial Contract Duration	3 years
Closing Date for Applications	08 December 2026
Start Date	01 March 2027
Interview Date	Week commencing on 11 January 2027

1. Background

The scope of the FSAF-PAAMS Programme is:

- The Definition, Development, Production and In-Service Support of the Future Surface to Air systems Family (FSAF), concerning the following systems:
    - Surface-to-Air Anti-Missile Systems for France (SAAM-FR) and Italy (SAAM-IT);
    - Surface-to-Air Medium Range Land system (SAMP/T) for France and Italy;
- The Definition, Development, Production and In-Service Support of the Principal Anti Air Missile System based on EMPAR radar (PAAMS-E) for France and Italy, including the "naval system common items" with UK ("C2 core" and VLS) and Long-Range Radar (LRR);
- The Aster ammunition MLU Production and In Service Support for France, Italy and UK;
- The capability Sustainment & Enhancement of Aster 30 ammunitions (Block-1 NT), SAMPT NG and PAAMS NG for France and Ital, and improvements of the UK PAAMS (Sea Viper).

The management of the FSAF-PAAMS Programme is aimed at optimising the use of as many common elements as possible and considers the potential to extend the capabilities of the systems in cooperation.

2. Duties and Responsibilities

The Logistics/Support Coordinator Officer will report to the Logistics/Support Section Leader and FSAF-PAAMS Programme Manager.

With the Section Leader, they are responsible for objectives concerning the Integrated Logistic Support (ILS) activities related to FSAF Programme and the coordination of the In Service Support (ISS) related to the FSAF/PAAMS/LRR systems and associated training & logistics means.

The post holder will:

- Plan and manage all aspects regarding ILS and ISS;
- Support the Section Leader in organising meetings, preparing all relevant documents regarding all aspects of ILS and ISS technical and contractual performance specifications, and carry out all necessary actions for ensuring the regular running of the Programme regarding the logistics;
- Support the Section Leader in the acceptance of deliveries pertaining to acquisition and supply contracts;
- Pursue the setting up of appropriate support organisation which satisfies participating states' requirements, liaising with governmental and industrial organisations for solving ISS issues;
- Provide coordinated cross-cutting logistic activities at systems level, trend analysis (LCC and Benchmarking) and contractual performance data analysis for Ground and

Naval systems including Ammunition in coordination with the commercial section;

- Coordinate the Ammunition logistic activities in the national pyrotechnical workshops (including any retrofits under warranty) which are performed/supported by Industry - through OCCAR contracts;
- Coordinate the logistic activities relating the ISS and the update of the Ammunition benches in the national pyrotechnical workshop;
- Coordinate the preparation and execution of the ammunition exercise firings in the national firing ranges;
- Monitor the coherence between ground and naval logistics and support activities;
- Ensure reporting to National Logistics organizations by monitoring all ISS activities via key performance indicators defined in dedicated contract(s);
- Exploit the lessons learned from ISS activities, in the perspective of the contribution to the formulation of new contractual logistic requirements for the support of ground and naval systems;
- Interact with all other Sections of the PD according to all relevant activities of interest;
- Contribute to Experts Working Groups, as directed by the Programme Manager;
- If necessary, take temporary additional task as required by the Programme Manager.

3. Key competences and skills required for the grade

(You must provide evidence of meeting these key competences and skills in your Application, Section 12).

CS 1 The ability to establish and maintain excellent working relationships at all levels in a multicultural context and with respect for diversity;

CS 2 Excellent interpersonal and team working skills with the ability to interact and communicate at all levels within OCCAR as well as with Nations;

CS 3 The ability to work in a changing, developing and demanding environment;

CS 4 The ability to implement clear, efficient and logical approaches to work, to manage assignments, objectives and time;

CS 5 The ability to use Computer and Information Technology (ICT) facilities and be able to demonstrate a good working knowledge of MS Office software.

4. Specialist knowledge and experience required for the post

(You must provide evidence of meeting these specialist requirements in your Application, Sections 10 and 11).

4.1 Essential:

ES 1 Excellent experience in the fields of Logistics and In Service Support of complex Defence systems, in particular in logistics engineering in the frame of Through Life Management, including Ammunition logistic activities;

ES 2 Proven experience in defining Integrated Logistic Support for complex Defence systems;

ES 3 Sound experience in technical management of ILS/ISS contracts (specifications, negotiations, deliveries, acceptance, relations with industry etc);

ES 4 Experience in international cooperation activities;

ES 5 Knowledge in applying project management disciplines in a true Through Life Management sense.

4.2 Desirable:

DS 1 Knowledge of Air Defence systems and ammunition;

DS 2 Experience in trials/testing and acceptance of technically complex deliverables;

DS 3 Good knowledge of Configuration, Quality and Risk Management's procedures;

DS 4 Previous experience of working with or in other Defence international organisations;

DS 5 Previous experience on operational-logistic management of the missile stockpile (maintenance, storage, transportation, etc.).

5. Language Requirements

- ADVANCED level[1] of ENGLISH both oral and written.
- Additional knowledge of another OCCAR Member or Participating State's language will be considered as an asset.

6. Qualifications

A university degree or equivalent education with several years of experience in activities directly related to the tasks prescribed is desirable. A master degree in Logistics should be an asset.

[1] The language levels can be found on the OCCAR website, www.occar.int Careers / Applying.

7. **Security Clearance**

Security clearance at OCCAR Secret level is required for this post.

8. **Applications and Points of Contact**

For further information regarding this Post, please contact:

Francis CELESTE (FSAF-PAAMS Programme Manager)

Email: francis.celeste@occar.int

Applications for this Vacancy Notice should be submitted through the appropriate National Administrations.

OCCAR Privacy Statement:

When applying for an OCCAR vacancy, it is necessary for OCCAR to collect and process personal data about you in order to assess and evaluate your suitability for the vacancy, and (if successful) to coordinate with relevant service providers in preparation of your appointment. ORGANISATION FOR JOINT ARMAMENT COOPERATION

VACANCY NOTICE

Post	A021 - SECURITY POLICY OFFICER
Grade	A3
Division	OCCAR-EA Directorate
Section	Security Office
Management of Staff	0
Location	Bonn, DE
Initial Contract Duration	3 years
Closing Date for Applications	17 December 2026
Start Date	01 April 2027
Interview Date	Week commencing on 25 January 2027

1. Background

The OCCAR-EA Security Office is responsible for maintaining the confidentiality of classified information by safeguarding it from espionage, compromise or unauthorised disclosure, and by safeguarding installations housing Classified Information from sabotage and malicious wilful damage.

The Security Office is also responsible for ensuring the implementation of security procedures as prescribed in the OCCAR Security Regulations OMP (OCCAR Management Procedures) 11 and 12. It maintains continuous liaison with national and local Security Authorities on all security related matters.

The minimum standards for the handling and protection of classified information, including such information held on communication and information systems, are defined in the OCCAR Security Regulations, Internal Procedures or Programme Security Instructions.

OCCAR-EA has furthermore established an integrated business framework covering Information, Risk management, Quality management and Information Security Management.

2. Duties and Responsibilities

In accordance with the OCCAR regulations framework and the requirements from the OCCAR member nations the Security Policy Officer is responsible for the processing and further development of the OCCAR Security Policies including the programme security instructions for the OCCAR programmes.

The Security Policy Officer reports to the Security Section Leader (SSL), who is reporting to the Deputy Director, while keeping a functional line to the Director of OCCAR-EA in urgent security matters.

The Security Policy Officer works closely together with the Programme Management Support Division, the Legal Advisor, the OCCAR Programme Divisions and the Programme Participating Nations. They are the contact person for the industry on all security questions.

In particular, they will:

- Identify and maintain all measures necessary to maintain personnel, information and physical security of the Organisation, including protection of the OCCAR-EA premises and staff against espionage, sabotage and terrorism;
- Keep the OCCAR security policy documentation (OCCAR Security Regulations - OMP11, Procedure on the handling of OCCAR Non-Classified Information - OMP 12) and the related Internal Procedures under constant review and coordinate further actions with the Security Section Leader (SSL) regarding the communication and approval process for changes with the Security Committee (SC), Future Tasks and Policy Committee (FTPC) and the Board of Supervisors (BoS);
- Prepare and maintain the OCCAR-EA internal security instructions and contribute to the development of evacuation and emergency plans for OCCAR-EA premises in consultation with the Site Support Division;

- Prepare, in close consultation with OCCAR-EA Programme Divisions' (PD) staff and Programme Management Support Division's (PMSD) Programme Integration Team (PIT), the drafting, coordination, review and final approval process of OCCAR Programme Security Instructions (PSIs) and associated Security Classification Guides, ensuring coherence, compliance with applicable security regulations and alignment with programme requirements;

- Advise OCCAR-EA PDs and PMSD as well as, where appropriate, contractors on procedural, contractual and Programme-specific security matters;

- Support, as required, Central Office Divisions during the integration phase of new Programmes managed by OCCAR;

- Provide additional guidance and support on compliance with U.S. export control regulations (e.g. ITAR/EAR), ensuring that contractual provisions, information handling procedures and programme execution fully address export-controlled items and associated security constraints;

- Support SSL during the negotiations of Security Agreements or Security Arrangements with new Participating Nations cooperating and deputise the SSL, where required;

- Support the SSL in the planning, development and delivery of staff security education and awareness activities, including briefings, training sessions and awareness campaigns. Contribute to ensuring that personnel are adequately informed of their security responsibilities, applicable policies and best practices, thereby fostering a strong security culture and promoting compliance across the organisation.

3. Key competences and skills required for the grade

(You must provide evidence of meeting these key competences and skills in your Application, Section 12).

CS 1 The ability to establish and maintain excellent working relationships at all levels in a multicultural context and with respect for diversity;

CS 2 Excellent interpersonal and team working skills with the ability to interact and communicate at all levels within OCCAR as well as with Nations;

CS 3 The ability to work in a changing, developing and demanding environment;

CS 4 The ability to implement clear, efficient and logical approaches to work, to manage assignments, objectives and time;

CS 5 The ability to use Computer and Information Technology (ICT) facilities and be able to demonstrate a good working knowledge of MS Office software.

4. Specialist knowledge and experience required for the post

(You must provide evidence of meeting these specialist requirements in your Application, Sections 10 and 11).

4.1 Essential:

ES 1 Thorough knowledge of security policies and procedures for the protection of classified information in one or more OCCAR Member States, NATO and/or the EU;

ES 2 Sound knowledge of industrial security policies and procedures, with experience in developing, implementing or managing security requirements and instructions for complex programmes or contracts;

ES 3 Proven experience in developing, implementing and maintaining security policies and procedures, including coordinating with stakeholders to ensure effective organisational application;

ES 4 Proven experience in applying U.S. export control regulations (ITAR/EAR), including interpreting requirements and ensuring compliant handling of export-controlled items;

ES 5 Proven experience in collaborating and negotiating with multiple nations in an international environment, including engagement with National Security Authorities (NSAs) or equivalent authorities on security-related matters.

4.2 Desirable:

DS 1 Previous experience in a security role within a national, international or multinational organisation;

DS 2 Practical experience in personnel, physical and information security;

DS 3 Good understanding of the European defence landscape, including key stakeholders, organisations and multinational cooperation frameworks;

DS 4 Completion of recognised export control training (e.g. ECTI), particularly in ITAR and EAR, with an understanding of their practical application.

5. Language Requirements

- ADVANCED level[1] of ENGLISH both oral and written.
- Additional knowledge of another OCCAR Member or Participating State's language will be considered as an asset.

6. Qualifications

University degree or equivalent in the activities directly related to the tasks described.

7. Security Clearance

Security clearance at OCCAR Secret level is required for this post.

8. Applications and Points of Contact

For further information regarding this Post, please contact:

Richard HUTCHINSON (Security Policy Officer)

Email: Richard.Hutchinson@occar.int

Applications for this Vacancy Notice should be submitted through the appropriate National Administrations.

ORGANISATION FOR JOINT ARMAMENT COOPERATION

VACANCY NOTICE

Post	A070 - SENIOR NETWORK AND COMMUNICATIONS ENGINEER
Grade	A3
Division	Information Division
Section	Information and Communication Technology Section
Management of Staff	2 (one staff, one contractor)
Location	Bonn, DE
Initial Contract Duration	3 years
Closing Date for Applications	19 January 2027
Start Date	01 July 2027
Interview Date	Week commencing on 22 February 2027

1. Background

The Information Division (ID) is responsible for providing services related to Information and Communication Technology (ICT) and Information Management (IM) to support and enable the Programme Divisions and the Central Office to carry out the core activities of OCCAR-EA efficiently and effectively.

This includes all matters relating to ICT and IM, including the management of IT infrastructure, cybersecurity, data protection, digital communication systems, collaboration tools, software applications, knowledge management, data governance, and ensuring the secure and compliant handling of all information across OCCAR-EA.

The ID comprises the ICT and IM Sections. The ICT Section is responsible for:

- Defining and implementing ICT policies and plans in support of OCCAR-EA, under the direction and guidance of the Head of Division, and in line with the broader OCCAR-EA Information Management Concept and overall OCCAR-EA strategy;
- End-to-end ownership of the acquisition, deployment, maintenance, cyber-security and configuration management of the entire OCCAR-EA ICT infrastructure and services, encompassing client devices, networking components, server environments, databases and corporate applications on premises and throughout all OCCAR sites;
- Overseeing the technical aspects of ICT support contracts and monitoring contractor performance to ensure service quality and compliance.

2. Duties and Responsibilities

The **Senior Network and Communications Engineer** acts also as the ICT Network Domain team leader and reports directly to the ICT Section Leader.

Responsible for resolving complex as well as everyday service requests relating to network hardware and software problems and malfunctions; interacting and consulting with customers and contractors; providing guidance, assistance, and follow-up on network related topics and defining and assisting in the implementation of related hardware and software.

The Senior Network and Communications Engineer leads the design, implementation, operation, security, and continuous improvement of the Organisation's network, communications, collaboration tools and Cloud related services. The role is responsible for ensuring reliable, secure, and innovative connectivity solutions, unified communications platforms and digital collaboration services and tools, while aligning ICT capabilities with business objectives.

The post holder acts as OCCAR-EA ICT (ID) Network Domain Team manager, reports directly to the ICT Section Leader, and serves as the designated **Deputy for the ICT Section Leader**, supporting the leadership and coordination of the ICT Section and being always ready to assume delegated management responsibilities when required.

In particular, they are responsible for:

1. Leadership and People Management

- Lead the Network, Communications and Collaboration domain and ensure the delivery of agreed objectives, projects, and service levels;
- Direct, mentor and develop network administrators, technical specialists, contractors, and external service providers;

- Coordinate the activities of external support personnel, managed service providers, and telecommunications suppliers;
- Manage changes, incidents, service requests, problems, and continuous service improvement initiatives within the network, communications, and collaboration domains;
- Act as the designated Deputy to the ICT Section Leader and assume delegated management responsibilities in their absence or as required.

2. Strategy, Architecture and Innovation

- Define, develop, maintain and govern the Organisation's enterprise network, network security, connectivity, unified communications, and collaboration architecture;
- Develop strategic roadmaps for network modernisation, like SD-WAN, cloud networking, Secure Access Service Edge (SASE), Zero Trust Network Access (ZTNA), software-defined infrastructure, and next-generation collaboration services;
- Evaluate emerging networking, communication, collaboration, automation, and AI-enabled technologies and provide recommendations for their adoption;
- Translate business requirements into scalable, resilient, secure, and cost-effective ICT solutions in collaboration with ICT stakeholders.

3. Network and Communication Services Management

- Manage enterprise LAN/VLAN, WAN, Wi-Fi, Internet connectivity, cloud connectivity, VPN services, remote access infrastructure, and DMZ environments;
- Manage Unified Communications and Collaboration platforms, including voice services, SIP trunking, video conferencing, meeting services, messaging, and digital workplace collaboration tools;
- Define, implement and maintain network monitoring, performance management, capacity planning, and service availability processes;
- Ensure high availability, resilience, business continuity, and disaster recovery capabilities for network, communication and collaboration services;
- Assisting on a technical level the organisation social media responsible business development staffs.

4. Security and Compliance

- Deploy, configure and administrate the secure cryptographic network gateways and secure client workstations for the classified networks;
- Ensure network and communication services comply with organisational security standards, cybersecurity frameworks, and regulatory requirements;
- Collaborate closely with the ICT Security Manager in defining and implementing secure network architectures, Zero Trust principles, identity-aware access controls, and secure remote access solutions;
- Oversee vulnerability remediation activities and support incident response related to network and communication services.

5. Vendor, Contract and Service Management

- Manage ISP, telecommunications, cloud connectivity, managed service, hardware and software support contracts;
- Develop technical specifications, statements of work, and tender documentation for procurements related to networking, communications, collaboration, and connectivity services;
- Participate in technical evaluations of proposals and vendor selection processes;
- Monitor supplier performance and ensure compliance with contractual obligations and Service Level Agreements (SLAs).

3. Key competences and skills required for the grade

(You must provide evidence of meeting these key competences and skills in your Application, Section 12).

CS 1 The ability to establish and maintain excellent working relationships at all levels in a multicultural context and with respect for diversity;

CS 2 Excellent interpersonal and team working skills with the ability to interact and communicate at all levels within OCCAR as well as with Nations;

CS 3 The ability to work in a changing, developing and demanding environment;

CS 4 The ability to implement clear, efficient and logical approaches to work, to manage assignments, objectives and time;

CS 5 The ability to use Computer and Information Technology (ICT) facilities and be able to demonstrate a good working knowledge of MS Office software.

4. Specialist knowledge and experience required for the post

(You must provide evidence of meeting these specialist requirements in your Application, Sections 10 and 11).

4.1 Essential:

ES 1 Proven experience leading network, communications and collaboration teams, including technical staff, contractors and external service providers. Demonstrated ability to manage incidents, problems, changes, service requests and continuous service improvement initiatives, while coordinating stakeholders and acting in a supervisory or deputy management capacity within an ICT environment;

ES 2 Proven experience in the design, planning, implementation, administration and support of enterprise network infrastructures and communication services, including LAN/WAN, routing and switching, Wi-Fi, MPLS, VPN, DMZ, cloud connectivity and unified communications. Experience in developing technology roadmaps and evaluating emerging technologies such as SD-WAN, SASE, ZTNA, software-defined infrastructure, automation and AI-enabled solutions is required;

ES 3 Proven expertise and experience in network security design, implementation and support for environments handling Classified information. Expertise and at least 5-year experience in CISCO-based security and communications solutions, including firewalls, VPN technologies, VoIP, video conferencing, messaging and collaboration platforms. Proven expertise and experience with military-grade or cryptographic communication systems, including SINA gateways and secure endpoints;

ES 4 Demonstrated ability to define, maintain and govern secure, resilient and scalable network, communications and collaboration architectures. Experience implementing cybersecurity frameworks, Zero Trust principles, secure remote access solutions, vulnerability remediation and business continuity/disaster recovery capabilities, in close cooperation with ICT security stakeholders;

ES 5 Proven experience supporting multi-year budget preparation, budget execution and the related ICT procurement activities, including technical specifications, statements of work, tender evaluations, SLA monitoring, contract management, supplier performance oversight and invoice approval processes.

4.2 <u>Desirable:</u>

DS 1 Cisco certifications in the domain of “Routing & Switching”, Security and/or Collaboration (Entry, Associate, Professional or Expert);

DS 2 First-hand experience in configuring and managing Layer 2/3 VPN gateway IT infrastructure; certifications in respective technology solutions (e.g., Cisco, SINA, Stormshield, Juniper, or similar);

DS 3 Practical experience in design, planning, tendering and implementation of complex network design projects, including new technologies such as unified communications and software-defined networks;

DS 4 First-hand experience with Cisco unified communication and video conferencing solutions; Palo Alto, NetAsq and Cisco ASA firewalls and IPS;

DS 5 Experience in being a leader of a diverse team of experts and in performing similar tasks in/for other international (preferred) or national organisations.

5. Language Requirements

- ADVANCED level[1] of ENGLISH both oral and written.
- Additional knowledge of another OCCAR Member or Participating State's language will be considered as an asset.

6. Qualifications

A university degree in the ICT field (e.g., Computer Engineering degree). Minimum requirement: EQF-6 (Level 6 of the European Qualification Framework).

A proven track record of at least seven (7) years of experience in providing IT Networks, Communication and Collaboration Services related directly to the tasks prescribed.

Required certifications:

1. IT network professional qualifications (minimum Cisco CCNP or higher)
2. Best IT practices for delivering and managing IT Services (e.g. ITIL 4)
3. Professional certification in SINA secure network infrastructure cryptographic communication systems and secure end-points.

7. Security Clearance

Security clearance at OCCAR Secret level is required for this post.

8. Applications and Points of Contact

For further information regarding this Post, please contact:

Manuel GOMEZ DE OLEA (ICT Section Leader)

Email: manuel.gomezdeolea@occar.int

Applications for this Vacancy Notice should be submitted through the appropriate National Administrations.
